## Description

Chicken (*Gallus gallus domesticus*) is a term which refers to a species of poultry. It is raised in many places for its meat and eggs.[1] They are usually kept by humans as livestock. Some breeds of chickens can fly for a short distance. Some sleep in trees (if there are trees around).

A male chicken is called a rooster or a cock(ere). Roosters do not have penises. A female chicken is called a hen; a young chicken is called a chick. Like other female birds, hens lay eggs. The eggs hatch into chicks.
